

MIKADO TOTAL FISHING

PASSION, KNOWLEDGE, EXPERIENCE

Sometimes, one moment is all it takes – the first bite, the adrenaline rush, the pure joy and satisfaction of catching your very first trophy fish. It all started with that one moment – a passion that, over time, turned into a way of life. And although each of us has their own story, they all come together by the water.

The Mikado 2026 catalogue is more than just a collection of products. It is a record of the journey we take together with you. It tells the story of early fishing mornings, when the silence before dawn speaks louder than the noise of everyday life. And of evenings, when the sun sinks beneath the horizon and you're still waiting for that one, final connection with a fish. When creating this catalogue, we thought about you. About anglers who freeze, get wet, drive hundreds of kilometres to catch... not necessarily a record, but above all emotions and memories that will last forever.

We have included thousands of hours of design, consultation and testing here. All so that you can enjoy your time by the water even more – with a rod, with friends, with nature. With each other. We believe that fishing is more than technique and equipment. It's about sensitivity to the beauty that surrounds us, respect for nature, and joy in the little things – things that cannot be bought, only experienced.

Thank you for being with us. That you choose conscious and responsible fishing. That, just like for us, fishing is something much bigger and more important to you than a hobby – a life passion.

Let this catalogue be your invitation to a new season, new adventures – to a story only you can write.

Thank you MFT

A minimalist front rest designed for one rod. Its shape effectively holds the rod during a violent bite, making it ideal for the method or bomb feeder technique. It also has a cutout for the line.

FEEDER PROFESSIONAL BACK REST 5011

A professional backrest that provides a steady grip of the rod. A great solution in particular for the bottom techniques. The material used is elastic and easily adjusts to the thickness of the butt of the rod used.

MF COMPETITION KEEPNETS

The MF Competition is a competition net with the third hoop from the end reduced to allow easier access and faster weighing of caught specimens. Additional handles also make it easier to pull the net out of the water and release the fish.

METHOD FEEDER KEEPNETS

Our keepnets are a perfect option for anglers who look for top-quality products at a reasonable price. Large diameter of the opening makes inserting fish easier; two final elements made of metal rings help keeping the keepnet under the surface.

CAGE KEEPNETS

A large, professional keepnet. Rectangular cross section better holds to the bottom and facilitates quick placement of even larger fish. Recommended in particular for feeder and float contests. Comes with a transport bag.

LNQ-SR01 CIRCLE AND SINGLE HOOK LING-SPOON SYSTEM

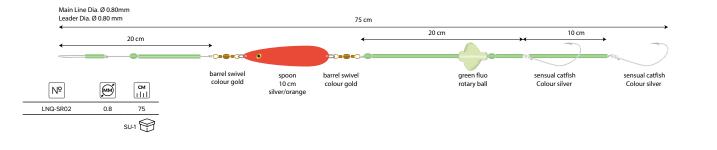

Pre-made rig made for angling with a Sea Boom. Recommended in particular for cusk and ling angling, using fish fillets and entire dead fish. It has a spoon that attracts the feeding fish and provokes them to attack.

LNQ-SR02 LING-SPOON SYSTEM LIGHT

Lighter version of the rig made for angling with a Sea Boom, using fish fillets and entire dead fish. Main line - 0.8mm thick, provides quick sinking of the rig; made for angling in average depths, with the lure elevated about 1-2 meters above the bottom.

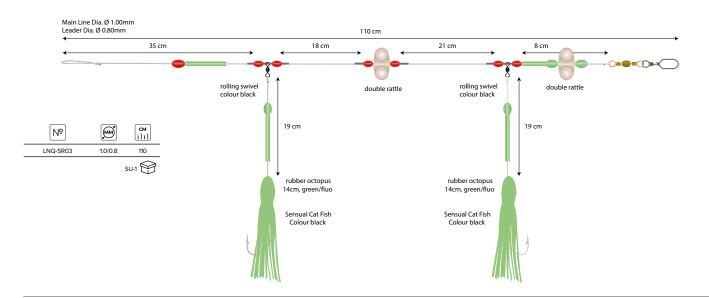

LNO-SR03 WOLFFISH SYSTEM FLUO

Great rig for wolffish and large cusk angling. Due to fluorescent octopus and rattlers, fish easily locate the bait - in this case, fish fillets are the best choice. Rig made for angling using heavy weights, in 50-100 m deep waters.

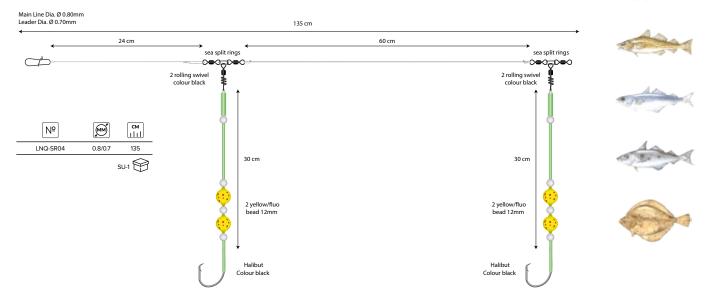

MIKADO 2026 379

LNQ-SR04 BASIS-SYSTEM ULTRALIGHT CIRCLE

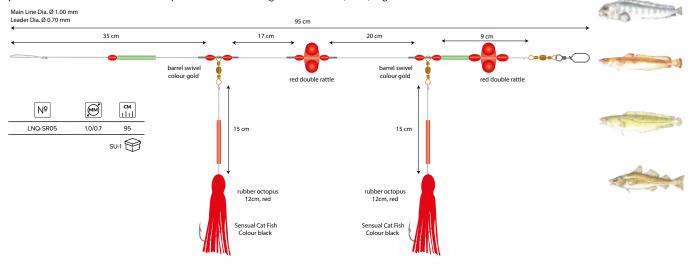

Versatile and effective rig for any sort of marine fish angling. Rounded hook facilitates striking. Rig made for angling using fish fillets and small fish in small and moderate depths - 5 to 50 meters.

LNQ-SR07 OCTOPUS DOUBLE-HOOK SYSTEM

Rig with two, self-striking hooks, for angling with fish fillets and small fish. It has a spinning rattle and a very natural, transparent octopus. Made for cod, pollock (saithe) and ling angling in deep and medium depths from 50 to 300 m.

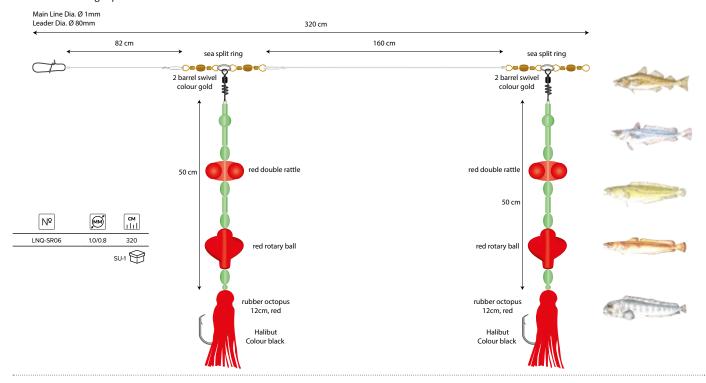

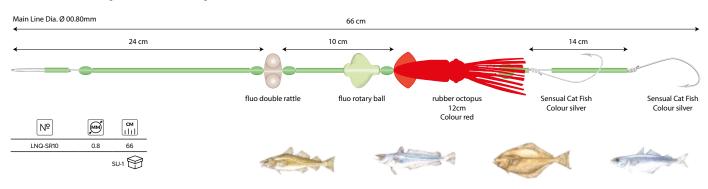

LNQ-SR06 COD-HAKE CIRCLE SYSTEM

Rig made for cod and hake angling. Rounded hook creates self-striking action. Made for angling with heavy weights in deep waters, with best results slightly above the bottom.

LNQ-SR10 SQUID DOUBLE HOOK SYSTEM

System with two hooks and an artificial squid. It has a spinning rattle and devilishly sharp hooks. Perfect rig for angling in waters 50 to 300 m deep, using live and dead fish. Made for: ling, cusk, halibut and large cods.

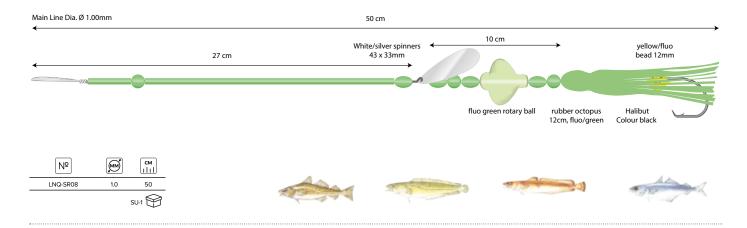

MIKADO 2026 381

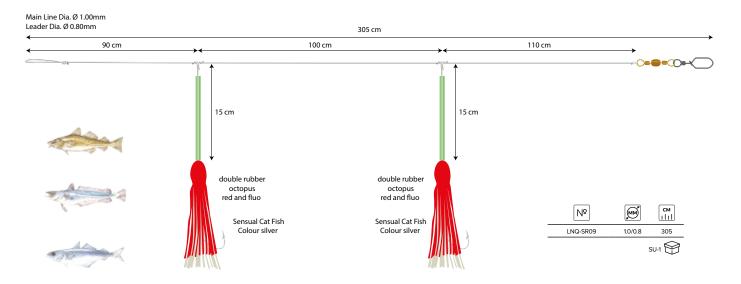

LNQ-SR08 OCTOPUS CIRCLE SYSTEM

System with an octopus that works best when angling in significant drift in waters 30 to 500 meters deep. Spin-pad attracts more fish and triggers additional baits. Made for: cod, ling, tusk, pollock / saithe.

LNQ-SR09 DOUBLE OCTOPUS SYSTEM

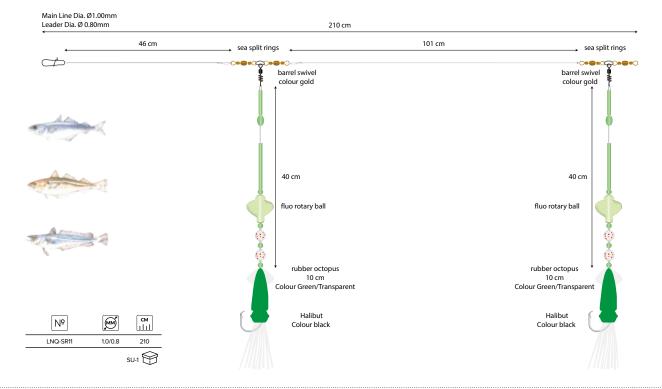

System with a single hook and a fluorescent tube, perfect for hake, cod and ling angling. Rig has to be led a few meters above the bottom with a heavy weight. It requires immediate striking right after the bait occurs.

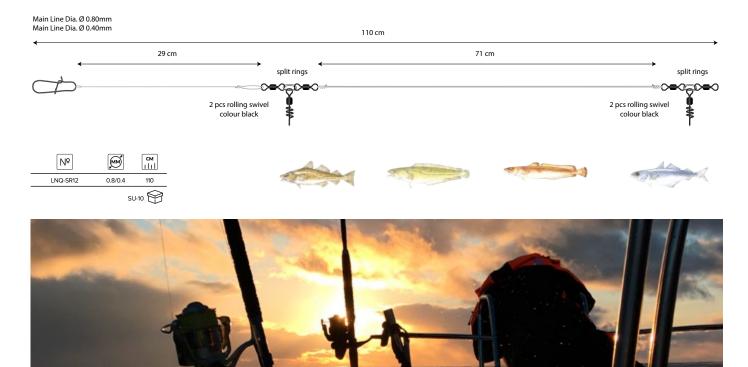

LNQ-SR11 MINI SQUID CIRCLE SYSTEM

Set made for shallow waters, will work perfectly for hake, cod, cusk and ling angling. Spinning, fluorescent beads create hydroacoustic wave. Rig is made for angling in waters 5 to 50 m deep.

LNQ-SR12 ULTRALIGHT BASIC SYSTEM

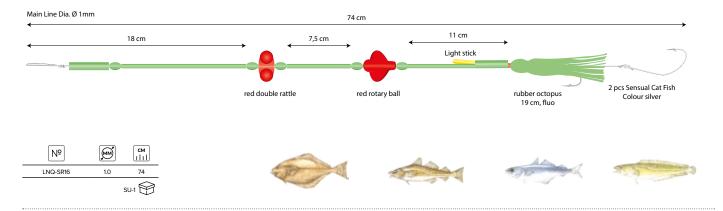

Basic system for most of marine fish angling. Main line is 0.8 mm thick, with a 0.4 mm diameter snood. Versatile system that can be freely used with variety of lures. It works best in 5 to 20 m deep waters.

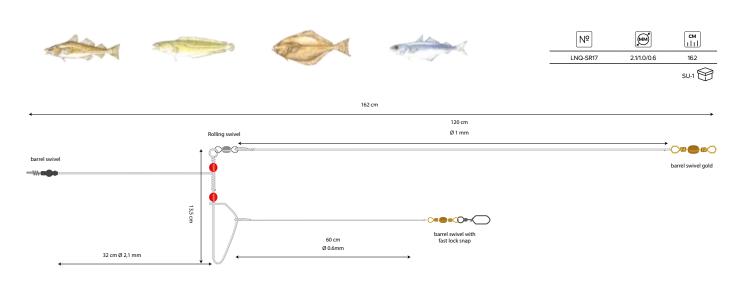

LNQ-SR16 SINGLE OKTOPUS DOPPELHAKEN SYSTEM

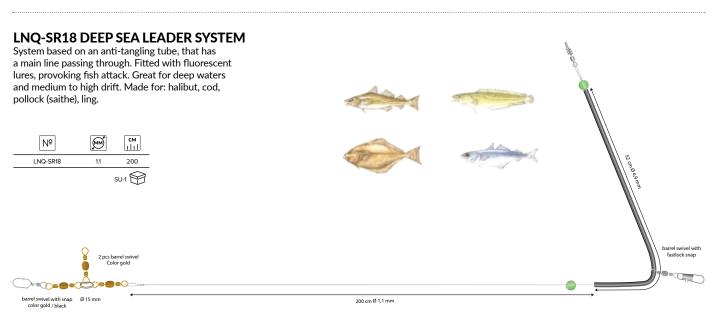

Single Octopus Double Hook is a set perfect for angling with large fillets or entire fish, that works great in deep waters. Set for deep water, large lures and of course large fish! Made for: halibut, cod, saithe, ling.

LNQ-SR17 DEEP SEA WIRE LEADER SYSTEM

System for angling in depths exceeding 150 m. Strong main line with 1.0 mm of diameter and 0.6 mm thick snood and hi-quality swivels provide durability and reduce tangling risk. Great system for deep water and low to medium drift.
